PIVOT CHART

A pivot chart is a graphical representation of data summarized using a Pivot-table. It helps us analyze, compare and understand large amounts of data through charts

Example: Using cookies sales data, we can create a pivot chart to compare the profit of different cookies across different cities.

How to Create a pivot chart in Excel

- Prepare the data sets
- Select any cell within the dataset
- Insert pivot chart → goto insert tab and choose pivot chart
- Choose the data range
- Select the chart location as New worksheet
- Arrange the fields by drag and drop
- Choose chart type such as Clustered column, Bar, line chart
- Customize the chart → Add a chart title, labels and other formatting as needed
